CTFPND-1 is a portable, multimedia GPS navigation system with a large 7" digital touchscreen of 480x234 resolution. The device is equipped with a very sensitive GPS module based on SiRFStar III 20 channels chipset. The device also has an integrated FM transmitter/modulator which will enable you to hear all sounds on your car speakers wirelessly.

Multimedia features allow to view movies and photos and to listen to music from the built-in speakers. The device supports all popular multimedia formats. As a memory expansion it uses SD/SDHC cards. The additional touch sensors on the front enclosure allow further control possibilities. The navigation software and maps are pre-installed, so the device out of the box is a turn-key solution.

#### Hardware

|           |                           |
|-----------|---------------------------|
| CPU       | Samsung S3C2440A, 400 Mhz |
| Flash ROM | 1 GB                      |
| SDRAM     | 64 MB                     |
